DEATH,

On the 27th February, at the Keeling-Cocos Is ands, ALFRED CLUNIES-Ross, aged 52 years.

HOMISKONG UFFICE: 14. DESVŒUX KOAD C

LONDON OFFICE: 181, FIRET STREET, E.C. Hongkong, 8th April, 1903.

WE had occasion the other day to comment

adversely on the shortcomings of the Detective Department of the Police in the arrest of criminals and the discovery of stolen property. We propose to-day to deal with another branch of the same subject, not less important and not less unsatisfactory. When the Chinese were invited to settle in this Colony on the occasion of its first occupation by the British Government they were guaranteed full protection in their persons and properties, and on the strength of this guarantee they flocked into Hongkong and under the ægis of the British flag prosecuted trade and industries that have largely nided to make the prosperity of the port. During the sixty years of British occupation the Chinese have grown to value

and appreciate the security to life and property, the freedom of movement, and the facilities for trade and commerce which are afforded under British rule and its just and equal laws. It is the duty and the interest of the local Government to see that this guarantee remains unchallenged and unimpaired, that the same absolute security to life and property, the same freedom to trade is continued to the Chinese frequenting the Colony as were afforded in the time of Sir HENRY POTTINGER, and other administrators onwards. If, at any time, through lack of firmness or want of thoroughness in any of the administrative departments this guarantee is impaired it

ment not easily to be restored. quence of the slackening of the reins in bar, which was relacd at \$20.

cannot fail to have a bad effect on the

minds of the Chinese population and will

cause a loss of confidence in the Govern-

the Police department, such a crisis is gradually being developed, though the complaints so fur are subdued and pathetic rather than sonorous and clamorous. But from what we can gather. there can be no doubt that a feeling of uneasiness, if not of positive alarm, prevails among a section of the Chinese population at the present time. Both in the local and in the Canton papers rumours are rife of outrages on Chinese of known Reform proclinities, which if not absolutely MANUFACTURERS. these stories is to the effect that an old man, reported to be Hung, a leader of the Kwangsi rebels, was recently assessinated in a house at Singingpoon (of course unknown to the Police), and his body smuggled to Canton. The alleged assassins are said to have been hundsomely rewarded for their work. One of the Hongkong native papers. asserts that the Kwangtung Government maintain a staff of spies in this Colony, for the purpose of finding out and reporting any Chinese supposed to be of progressive ideas or advocates of reform. It is also believed by many members of the Chinese community that the Kwangtung Government have a list of upwards of one hundred Chinese of the influential and enlightened class marked down as persons to be dealt with when opportunity offers. Such oppor-Reformers visit Canton, or any of their family or friends place themselves in the GUARANTEEING ABSOLUTE clutches of the mandarins. That there is Kowloon on Monday morning through being some good reason for apprehension may fortunate Chinese school master who was brutally murdered in his house in Gage Street on the 10th January, 1901, a crime which has never yet been punished, the

> always, every day, a chance of the repetition of that tragedy, and the next victim may not probably be a person of greater distinction. The wei-yuene who are led, by the offer of substantial rewards, to plan the disappearance of "wanted" individuals, may at any moment endeavour to vindicate their claim to be successful emissaries of their Government, and a new but secret disappearance from the Colony will be the result. We are not writing in any alarmist spirit. We are well aware that the rumours to which the tea shops and newspapers give currency must be heavily discounted, but there is no smoke without fire, and it is at least certain that the Cantonese spy is always among us watching for an opportunity for mischief. It has been the pride and boast of Great Britain that her soil provides a safe refuge for the political exile from other lands, the man who for conscience sake has been compelled to seek an asylum beneath the Union Jack, and no exception must be made against the Chinese advocate of reform in government. If Chinese criminals take refuge on these shores, it is open to the Chinese Government to apply for their rendition, and this has never been refused when a case has been proved against the person applied for. But when political assassination is threatened or committed in the territory of a friendly State it is high time the Government of such State took measures to meet and defeat the machinations of the Chinese officials or their myrmidons. To do so successfully, however. and detect and prevent murders like that of the Chinese schoolmaster in Gage Street, a very much better and more effective Detective service than now exists in the Colony must be organized.

LONDON, 5th April. The Japanese cruisers Iteukushima, Maisushima and Hashidate have arrived at Free-

These cruisers it may be remembered had the six cylindrical boilers in each replaced by eight watertubes, the two former by Bellevilles, with economisers, the latter by the system Engineer-Admiral Miyabara. Fitting the Bellevilles necessitated costly re-arrangement of hull fittings, additional auxiliary machinery and pieroing the armoured deck. The Miyabara system required none of these items, even the boiler valves and funnel of the old boilers being used, so that the respective costs were about 3 to 2. The engines and propellers were as before. The trial showed that the Hashidate's propellers "cavitated, otherwise her full speed should have been 17.1 knote, the Matsushima's propellers being better proportioned. These two vessels were originally tried at about 4,100 tons displacement, when their trial trip speed was 16,5 knots: Recent trials after reboilering gave for full power in the Hashidate 15.97 for 4,573 h.p., and in the Matsuhima 14,72 knots for 3,829 h.p.; the natural draught trials gave in the Hashidate 14:55 knots for 8,041 h.p., and in the Matsushima 13.47 knots for 3,060 h.p., the vessels being tried at 4,450 tons displacement, The coal consumption was smaller in the Hashidate, and both less than with cylindrical boilers 7

## ODD VOLUMES LECTURE.

Under the auspices of the Odd Volumes Society, Hon. F. H. May, C.M.G., Colonial Secretary, lectured in the Chamber of Commerce yesterday evening on Tewish wit and humour. Commodore C. G. Robinson, R.N. presided over a large audience. The lecture was rich in anecdote and very entertaining. We are sorry that we cannot publish it, as Mr May stated at the commencement, much to the amusement of his heavers, that he was no desirous of his Hebrew stories becoming public The new German river gunboat for China through the Press with the possible result of ment of 170 tons and a speed of 13 knots, which | wise last for a year or two. At the conclusion few exemples of Hobraic wit, and Mr. May was awarded a cordial vote of thanks on the motion of the Commodore.

## THE LILLIPUTIANS.

The Lilliputians arrived yesterday afternoon on the Rubi, after a rather protracted voyage from Manila. They are all in splendid health apparently, and are enthusiastic in their praise of Manila. According to reports to hand, the last night in Manila was a memorable one. The Zorrilla Theatre was packed-in fact, the Fire department, stopped the sale of tickets, and hundreds were turned away. The performance was vaudeville, and soldom have they met with suchenthusiasm. At the close of the performance, nearly 20 years later, and after serving in the curtain was raised, showing the entire comthe Persian Gulf and the Mediteraneau, that pany standing on the stage. TRAGEDY IN THE HARBOUR.

A sad tragedy occurred on board the steamer Sikh during the night on Monday, the master, Mr. F. J. Pentreeth, being found dead in his cabin yesterday morning, a revolver by his side and a ragged bullet would in his forehead. The first intimation of the deplorable affair came from the steward who entered Captain Pentreath a cabin with his master's morning cup it may appear on paper, the task of resoning of coffee, and his excited story quickly brought | the ship from her predicament was not so easy the officers of the ship on the scene. ## THE NEW PACIFIC MAIL LINER.

S.S. "SIBERIA" IN HONGKONG. The new Pacific Mail Steamship Co.'s s.s. Siberia, sister ship of the Korea, arrived yestertaking 27 days for the whole voyage. Captain congratulated on the success attending her maiden journey over the Pacific. But the Siberia has already proved herself a fine sea-going vessel. cre w endorse the skipper's opinion. "We met a heavy north-caster coming up the coast," said Captain Porter, who came around in the Siberia with terrific force, was accompanied by big seas. The force of the wind reduced our speed from sixteen to twelve knots, but the waves wasted their energy when they tried to rock this

The Siberia is slightly larger than her sister ship the Korea, her tonnage being three tons greater, 11,184 in all. In general equipment and accommodation the boats are duplicates. In the matter of speed, however, the Siteria is about two knots faster than the Korea and certain mistakes in arrangement discovered when the Ko.ea was put to the test of actual service have in the Siberia been corrected. From New York to Frisco the steamer used only six of her nine boilers. She came through said to be the record time.

As the lay in the Harbour yesterday the levis than came in for a large share of attention from the shipping community, while her hage bulk also attracted many eyes from the shore,

Shortly before the collision the lights of the Hoi-kinng were made out about a mile ahead. The latter must have been as nearly as possible end on the Eclair. On her side, the Eclair was nearly end on to the Hoi-kiang, the latter being just a little on the former's port bow. After making out the other vessel's lights, the Ectair ported a little until she dropped the green light and had the red only; and then kept on her course red to red, on which they would have passed amply clear. Until they were close up to one another-something like five or six lengths of the Eclair apart—they kept red to red, when suddenly the Hoi-king shut out her red light and showed her green, indicating that she had starboarded and was crossing the bows of the Eclair. According to advices from the Amur region, Russia is threatened with the organisation of another "Russian Republic" in the near neighbourhood of Blagovescensk. A claim to work the gold on the Chinese side of the Amur was granted to Count Apraxin, whose agents entered into possession and began work. When the status of Russia in Manchuria changed, en paper, there was something very like a gold "rush" to this neighbourhood, and Count Apraxin's agents have been compelled organise a regular armed force for the protestion of their rights. The situation is reported to be becoming ripe for the interference of the Government. The gold deposits are exceptionally rich. An enormous trade in spirits is being done with the new gold-fields chiefly from Kharbin. Russian vodka has been imported into Manchuria in phenomenal quantities owing to the closing of the Moscow distilleries with the introduction of the Government Drink Monopoly. The ousted spiritdistillers sent practically a two years' output off to Manchuris, and, as this is now apparently becoming exhausted, a limited company is being formed at Kharbin to establish a distillery on the spot, the Russo-Chinese Bank being the chief movers in the enterprise.

## GERMANY AND THE YANGISZE.

Germany is very keen on having the same rights and privileges in the Yangtaze Valley as any other Power. Her steamers, remarks the N.-C. Daily News, came on to the river some forty years after the English and American flags were first seen there but she takes the scriptural view that the last shall be first, and if no convenient room has been left at the open ports for her hulks and her wharves, she has men-of-war and Admirals, and somebody must move to make way for her. That is the ides of the open door entertained by her steamer companies, observes our contemporary, and they are gallantly backed up by their Consuls, while the British steamer companies often find it a hard task to get our Consuls to assist them. Below Nunking there is a wellknown cut-off, called the Straw Shoe Cut-off, which saves some thirty to thirty-five miles of gines and ported her helm. This course of action, and the Commissioners of Customs, and is effect. ## NEW U.S. WARSHIPS.

The Naval Appropriation Bill which has been passed by the U.S. Legislature provides for three battle-ships of 16,000 tons displacement and two battleships of 13,000 tons displacement, and entirely eliminates the provision for cruisers. By this arrangement two 13,000. ton battleships are substituted for one cruiser. It is provided that the ships authorised may b built by contract or at the navy yards and shall be built at the navy yards if it is found that a combination of ship-builders exists; the provision for an increase in the personnel of the Navy remains as the bill passed the House, including an increase in number of midshipmen, but the increase is to continue until 1913 | Bays :-instead of 1909 as fixed by the Senate. The total carried by the bill as agreed to \$81,877,291. The cost of the three large battleships is not to exceed \$4,212,000 each, and of the two smaller battleships not to exceed

## GOLD-MINING IN BORNEO.

Mr. William Kershaw, an Australian mining expert, who has been superintending the setting up of hydraulicing machinery in Netherlands Borneo for a local gold mining venture, styled the Alluvia Mine Company, speaks highly of the results obtained. He says that the last returns show a profit on the concern of one hundred per cent. after deducting working expenses. Mr. Kershaw

thus described prospects there:-Borneo offers a good field for gold-mining investment. I have travelled over a considerable portion of Dutch West Borneo, and the opinion I formed of it, from a gold-mining point of view, was very favourable indeed. A yield of 100 per brandy as a stimulant for medicinal and quasicent. is extremely good, and the Datch company have a large area of very profitable ground. In my opinion Borneo will become an important gold-producing centre, both for reefs and for alluvial. There is, of course, the overhang of the Ectair was very great and al- the Commissioner of Customs that he will be great question of labour; but that can easily though she was cut into so deeply she was not fined Tls. 500 if he uses the cut-off, and then to be overcome. But once they get their pay in their hands they are as some Europeans. Th climate is tropical; but if he takes care of himself a European has little to fear from malaria or any similar disease. From what I saw, should say that it will take some three or four years to open the country up properly. I have no doubt that great results will follow. I may say that during my sojourn in Borneo I received every consideration from the Dutch. Both the Government officials and the private citizens welcome this gold-mining enterprise; and they gave me every assistance I required.

By a decision of the City of London court English newspaper proprietors in the eye of the law are manufacturers, and as such do not infringe on the Lord's Day Observance Act by publishing Sunday papers. This important and somewhat carious decision came up through a suit brought by Lloyd's Weekly to recover payment for Sunday papers delivered to a country newsagent who had refused to pay under the pretext that the laws made the claim invalid. Judge Rentoul held that the Sunday papers did not come under the head of "works of necessity," but as the Sunday Act only referred to contracts entered into by a "tradesman, workman or labourer," the proprietors of Lloyd's Weekly, as manufacturers, were exempt from the accusation of illegality and were entitled to their

#### WHISKY-GOOD AND BAD. Those who use whisky will read with in-

terest the following extract from the Daily Telegraph :- During the last few weeks a most interesting and important correspondence has been appearing in our columns under the general heading of "Pure Malt Whicky. Perhaps its most striking feature has been its extreme catholicity. In closing the controversy, it may confidently be said that it has brought into prominence the material points at issue. Whisky has enormously increased in popularity of recent years. It has, on the one hand, to a very considerable extent supplanted wine at the luncheon and dinner table; and, on the other, taken the place of medicinal purposes. One can hardly, therefore exaggerate the importance to the general healt. of the community that the spirit consumed should be wholesome and unadulterated. It not alone the British Isles which are interested in this matter. Whisky, or what purports to be whisky, is imported into the British Colonies in enormous quantities, and it is common knowledge that thousands of gallons of raw, flery spirit are sent overseas from the Continent, dressed up in the guise of good Scotch whisky, and out-Highlanding the genuine Highland article in the spleudour of its tartans on the label. Large consignments of this cheap and furious spirit also find their way into this country, and the most disquieting letters which we have published have been from well-known analytical chemists, who set forth in plain terms the contents of certain samples which they had carefully examined.

A SIGN OF DEFECTIVE INTELLECT.

"Kismet," the famous Court palmist royal, is \$2,000,000 in sight on that claim alone. an Indian paper observes, says he has made a discovery in connection with his art which he believes may prove as important a factor in BOTTLED ALES, BEERS AND criminology as the detection of criminals by the impress of their thumbs. "Many criminals," says. "Kismet" "are hanged or otherwise punished for offences of which they are undoubtedly guilty, but for which Ind, Coope & Co.'s they are not really responsible, owing to some unsuspected defect of intellect. Bass, Light Gravity the result of two years' patient study of the matter, and the observation of not one or half Bass, Light Gravity a dozen but of many cases, I affirm that the human being who is mentally deficient in some Dortmund, Pilsener Chinese never give them any trouble with way, even slightly, invariably betrays self when asleep by the position in which he holds his El Capitan, thumbs. They are always turned in. way in which I first traced the connection between deficient intellect and the inturned thumb was by observing a baby. Newly-born babies always have their thumb turned in, but as the child's intellect develops so the thumb turned out. Next I took the case of monkeys and apes, which lack the divine intelligence of man, and found that they already kept what one might call their thumbs turned in. Then I watched maniacs, imbeckles, people who were known not to have a fully developed intellect and those who were hevering on the border-line of invanity. One and all slept with their thum a turned in, whereas a man who is perfectly same does not. Now, it occurred to Quinness. me that by the simple expedient of watching a suspected or condemned oriminal while asleep it might be gathered whether he was wholly mentally sound. If the thumb suggested he was not, then it would be the business of the doctors to find out in what way. I am deeply MACISTURE & CAMERON, LID, Waverley Works interested in the matter, and should much like 72045-3 to hear expert medical opinion."

THE NEW FRENCH REMEDY

This successful and highly popular remedy, used in the Continental Hospitals by Ricord, Rostan, Johert, Velpcan and others, combines all the desiderata to be sought in a medicine of the kind, and surpasses everything hitherto-

employed.

THERAPION NO. In a reshort time, often a few days only, removes all discharges from
theurinary organs, effectually superseding injections, the use
of which does irreparable harm by laying the foundation of
stricture and other serious diseases. In dysentery, piles,
irritation of the lower bowel, cough, broachitis, asthma, and
some of the more trying complaints of this kind, it will be
found astonishingly, efficacions, affording prompt relief
where other well-tried remodies have been powerless.

THERAPION NO. 2 for im-the blood, acurry, pimples, spots, blotches, pains and swel-lings of the joints, secondary symptoms, gout, rheumatism, and all diseases for which it has been too much a fashion

to employ mercury, sarsaparilla, &c., to the destruction of sufferers' teeth and ruin of health. This preparation purificathe whole system through the blood, and thoroughly climinates every poisonous matter from the body.

THERAPION NO. 3 pervous enhancion, impaired vitality, sleeplessness, and all the distressing consequences of early error, excess, residence in hot, unhealthy climates, kc. It possesses surprising power in restoring strength and vigor to the debilitated.

THERAPION is sold by the principal Chemists and Merchants throughout the world. Price in England 1/9 k 4/6. In ordering, state which of the three numbers is required, and observe above Trade Mark, which is a facsimile of word "Therapion" as it appears on the British Government Stamp (in white letters on a red ground) affixed to every package by order of His Majesty's Hon. Commissioners, and without which it is a forgery.
